

The screenshot shows the THC website interface. At the top left is the THC logo with the tagline "THE LEGAL HIGH". Below it are navigation links for "Customer Care", "Login", "Register", "Contact us", "Help", "Cookie Policy", and "Forum". A search bar and a "Questions" button are also visible. The main content area features a grid of products, each with a small image and a "BUY ONE GET ONE FREE" offer. The products listed are: FLY AGARIC MUSHROOM EXTRACT POWDER, PANTHERINA MUSHROOMS, Sceletium TORTUOSUM (KANA) EXTRACT X30 POWDER, and SAN PEDRO CACTUS. A large, prominent image of a yellow bag labeled "MDAI Gold" with a stylized eye logo is shown on the right side of the product grid. Below the product grid is a banner for "Power Flower Spring is blooming with its Wildest Petals" featuring a colorful van and the text "Encourages Blooming".

Modern High: Using The Internet To Obtain Substances of Abuse

Blaine (Jess) Benson, Pharm.D., DABAT
Regents' Professor, UNM College of Pharmacy
Director, New Mexico Poison & Drug Information Center

Presentation Objectives

- Find websites selling psychoactive substances of abuse
- Describe information available at the Vaults of Erowid
- Give an example of a compound (chemical or product name), marketed as a legal high and belonging to the following chemical classes: cathinone, cannabinoid, cocaine derivative, phenylethylamine, ketamine derivative, and tryptamine.
- Cite the clinical effects and toxicities associated with each chemical class covered.

Background

- Stats on internet sales
- Drug abuse stats
- Drug-related death stats
- Availability

So You Want To Get High...Legally

- Advantages of the internet as a source
 - No need to find a dealer
 - Greater variety of agents
 - Reasonable priced
 - Delivered to your home in inconspicuous packaging
 - They are legal!!! (well ... maybe not)
 - They are SAFE!!! (definitely Not!)
 - Searching is half the fun

LEGAL PRODUCTS AVAILABLE FOR EACH USA STATE!

We have several versions of each of our Am-Hi-Co and other branded products to reflect where they can be legally sold. Black Mamba Ultra for e.g. is available in 4 versions and we clearly list which state in the USA each formulation is legal to sell. See our CHECK LAW section for details.

ORDERING BY CREDIT/DEBIT CARDS

THIS WEBSITE SHOULD NOT BE VISITED BY ANYONE UNDER THE AGE OF 18. We will not ship our products to anyone under the age of 18.

Beware sites that claim to be cheaper than us. Their delivery costs are often hidden or the costs of their products are higher than ours. Be sure to check the shopping cart for the final price before purchasing.

We guarantee lower prices than our competitors on all of our products. If you find any Am-Hi-Co product cheaper elsewhere, please let us know via the 'Contact Us' link at top and we will happily refund your card the difference.

SECURE SITE ORDERING - TRUSTED BY THOUSANDS WORLD WIDE

Please note: All our USA orders are now dispatched from our EU shipping centre and will take 5-8 working day to arrive. Orders placed before 2:00 p.m. (EST) are processed within 24 hours and generally ship within 48 hours, subject to available stock. Once we process your card and ship the order the tracking code will be mailed to you.

For our U.K. customers, we ship our products via Royal Mail Recorded or Royal Mail Special Delivery Next Day. Orders are shipped directly from our U.K. dispatch center.

For our European customers, all orders are promptly shipped from our European dispatch center and will arrive throughout Europe in 5 - 7 days.

are in force on the federal level and several states. The Federal Analog Act is a law that has serious concerns with its vague language along with the serious weakness of being limited to banning substances intended for "internal use".

Typically, there is no law for a specific license to sell bath salts, plant feeders, incense, or potpourri among the states. These goods are too prolific for effective enforcement of licenses. The common practice is to ban the substances in the goods. These can be identified by chemical tests and is a lot less burdensome than asking every general goods store to have a license for a handful of products.

Our herbal blends, bath salts and pills are completely compliant to New Mexico state laws and Federal laws and possession, sale, import, export below mentioned products is completely lawful:

Legal Highs & Incense & Ethnobotanicals

Legal Highs and Incense are perfectly formulated to complement your moods and add some spice to your social gatherings.

Ethnobotanicals

For ethnobotanical study: Blue Lotus, Hawaiian Baby Woodrose, Fly Agaric Mushroom and Peruvian Torch (San Pedro) Cactus.
Ethnobotanical pertains to ethnobotany, the scientific study of the relationships that exist between people and plants.

Party Pills

These will keep you humming all night long and having a giggle at the same time.

Herbal Blends

Herbal incense and aromas to induce a mellow, fuzzy, happy, laugh along vibal. You won't be disappointed!

MDAI

COMMON NAMES

MDAI

EFFECTS CLASSIFICATIONS

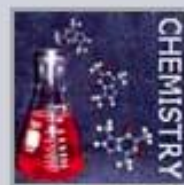

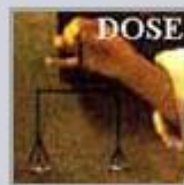

Empathogen; Entactogen

CHEMICAL NAME

5,6-methylenedioxy-2-aminoindane

DESCRIPTION

MDAI is a synthetic chemical that first became available via online vendors in 2009. Its effects are sometimes compared to MDMA (ecstasy), although significantly weaker and less stimulating.

HISTORY

A Very Psychedelic Surprise

MDAI

by [FractalStructure](#)

Citation: [FractalStructure](#). "A Very Psychedelic Surprise: experience with MDAI (ID 94689)". [Erowid.org](#). Mar 1, 2012. [erowid.org/exp/94689](#)

DOSE: T+ 0:00	100 mg	oral	MDAI	(powder / crystals)
T+ 2:30		smoked	Cannabis	
T+ 6:00		smoked	Cannabis	

BODY WEIGHT:	150 lb
--------------	--------

I'm a 24 year old male, and for a long time I was interested in the chemical MDAI. I saw it once or twice, and it looked like chocolate mix. So I never took that stuff, and it ended up being less than 50% MDAI anyway, so I'm glad I abstained. However, a year later or so after seeing that it was about to be banned federally, I decided to try some. This batch looked very different from the first, it was a tan shade, and quickly turned red using the marquis reagent (MDMA style, very fast reaction, the color was even similar but red not purple), and brown with mecke.

One thing I noticed is a serious lack of information about this substance on the internet, and the information that does exist can be very contradictory (because it has to do with subjective reports, and MDAI is known to sometimes be very impure, leading many people to consume other substances, sold as MDAI on "reputable" sources... the correct Marquis reagent color is not even empirically known, and varies from red to no reaction for supposedly pure MDAI). Regardless, from what I gathered I thought it'd be "a relaxing night with the missus". I thought it would have the empathogenic effects of MDMA and all the serotonin activity but no speediness, and I expected it to be mild (it's worth noting that a non-neurotoxic version of MDMA/MDA was the reason I was interested in the first place). Especially at the planned dose of 120mg, said to be on the small end. On top of that, about 20mg of my dose fell off the paper, so I ended up taking 100mg. My partner, L, took the full 120mg of the same batch.

30 mins

Laying in bed, talking for the past half hour, I wonder if I'm ever really even going to come up... I have heard of that happening. Or whether the dose I took was too mild. Oh well, I figure. After getting up to go to the bathroom, I noticed that movement was a little different, and it was nice to feel my own skin. Even nicer to feel L in bed. My hands felt like they "sensed" more. But it wasn't anything intense.

Within about 10 mins, at some point, I felt a sharp, unexpected MDxx-like comeup, with startling intensity. Like MDMA, it went from "0-60" in 1 second. One second, nothing; the next second: EVERYTHING! This is feeling a little bit like mescaline, which surprises me. And then I realize...

1hr

This actually feels nothing like MDMA! But it feels SO MUCH like MDAI! In fact, it feels much trippier than MDA, and the MDA body feeling is very noticeable. L, who really likes tryptamines, was also very surprised by how psychedelic the experience was at this point. She remarked on how to her it kind of felt like a tryptamine (she is unfamiliar with MDA). Things were getting very dreamy, and it was very difficult to think of sentences to say. What was supposed to be a romantic night together was becoming a somewhat dissociated, silent night. Not that we didn't connect.

Buy MDAI Gold

Buy MDAI Gold (Sparkle)

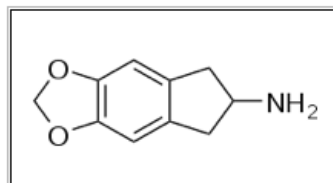

We have recently secured a new supply of extremely high quality MDAI directly from a leading research chemical lab in India. We are the only UK supplier selling this MDAI and we are sure that you will agree that it is the highest quality MDAI available in the country.

MDAI Gold is so called because it is a white powder with a slight golden sparkle. It has a much lower density than our older MDAI and reacts much more vigorously in a Mandelin, Marquis and Mecke test.

Although our older MDAI was a very high quality product, we believe that our MDAI Gold exceeds all other MDAI available in the UK. It is manufactured in one of the newest research chemical laboratories in the world using state of the art equipment and cutting edge synthesis techniques to ensure minimal impurities. There is no other MDAI of this calibre available on the UK market it is a must have for any serious researchers.

Buy MDAI with your credit or debit card today from our UK store, we have next day delivery available on all UK orders.

Due to supply issues we have restricted the maximum price break to 1g and 2g bags.

Systemetic (IUPAC) Name

5,6-Methylenedioxy-2-aminoindane

Identifiers

CAS Number	132741-81-2
PubChem	CID 125558
ChemSpider	111694

Chemical Data

Formula	C ₁₀ H ₁₁ NO ₂
Mol.Mass	177.1998 g/mol

Our research chemicals are strictly not for human consumption.

(5,6-Methylenedioxy-2-aminoindane)

MDAI or Sparkle as it is otherwise known is one of the UK's most long standing research chemicals and one of the original products listed at chemicalwire.com and sister site research-drugs.com.

What is MDAI?

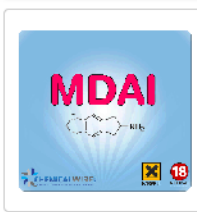

The name of this research material is 6,7-dihydro-5H-indeno[5,6-d][1,3]dioxol-6-amine (MDAI). MDAI belongs to a class of research materials known as selective serotonin releasing agents. MDAI is available as a white powder and is the form of its hydrochloride salt. MDAI is designed for both cellular and animal models.

Buy MDAI online today at chemicalwire.com

There is only one manufacturer of genuine MDAI worldwide and chemicalwire.com along with a few other select websites have been given the rights to distribute and sell this chemical online in the UK and Europe.

As with all research chemicals, they are strictly not for human consumption and we only accept and deliver orders of MDAI within the European Union. Please see our [terms and conditions](#) of sale and / or [help pages](#) for further information.

Verisign Approved

Neuropharmacology of Getting High

- **Dopamine**
 - Euphoria, pleasure
=> dysphoria, paranoia
- **Norepinephrine**
 - Increased lucidity
=> hypertension, tachycardia
- **Serotonin**
 - Delusions, empathy=> serotonin syndrome

Our Menu For Today

- Cathinones
- Phenylethalamines
- Cannabinoids
- Ketamine/PCP derivatives
- Tryptamines
- Salvia divinorum

Synthetic Cathinones

- Availability
 - Sold as bath salts, insect repellants, plant food, and stain removers
 - Product names include: Arctic Blasting Station, Atomic, Bayou Revitalisant, Blaze ,Blitz, Blue Moon, Blue Silk, Bohemian Bath Salts, Bolivian Bath Salts, Dr. Booga Shooga, Cloud 9, Cloud 10, Columbian Odorizer, Cotton Cloud, Dream, Dynamite, Euphoria, Hurricane Charlie, Ivory Wave, Ivory Wave Ultra, Lady Bubbles, Legal, Love Potion 69, Moon Dust, Night Cap, NRG-1, Q Concentrated, Red Dove, Resin, Scar Face, Serenity, Super Clean Stain Remover, White Cloud, White Diamonds, White Dove, White Girls Bath Salts, White Lightening, Zoom
 - Average Price: \$20 per packet of powder.

Synthetic Cathinones

- Active Ingredients
 - Cathinone is derived from an African plant called Subbare Kat or Muktaree Kat (*Catha edulis*).
 - The published U.S. experience indicates that most products contain either 4-methylmethcathinone (mephedrone), 3,4-methylenedioxypropylone (MDPV) or 3,4-methylenedioxypropylone (methylone). Some states (Louisiana) have also included 4-methoxymethcathinone (methedrone), 3-fluoromethcathinone, and 4-fluoromethcathinone (flephedrone) in their Schedule I rule.

Synthetic Cathinones

- Pharmacology
 - Pharmacologic properties similar to amphetamine
 - Likely increase release of dopamine, norepinephrine and serotonin in various areas of the brain

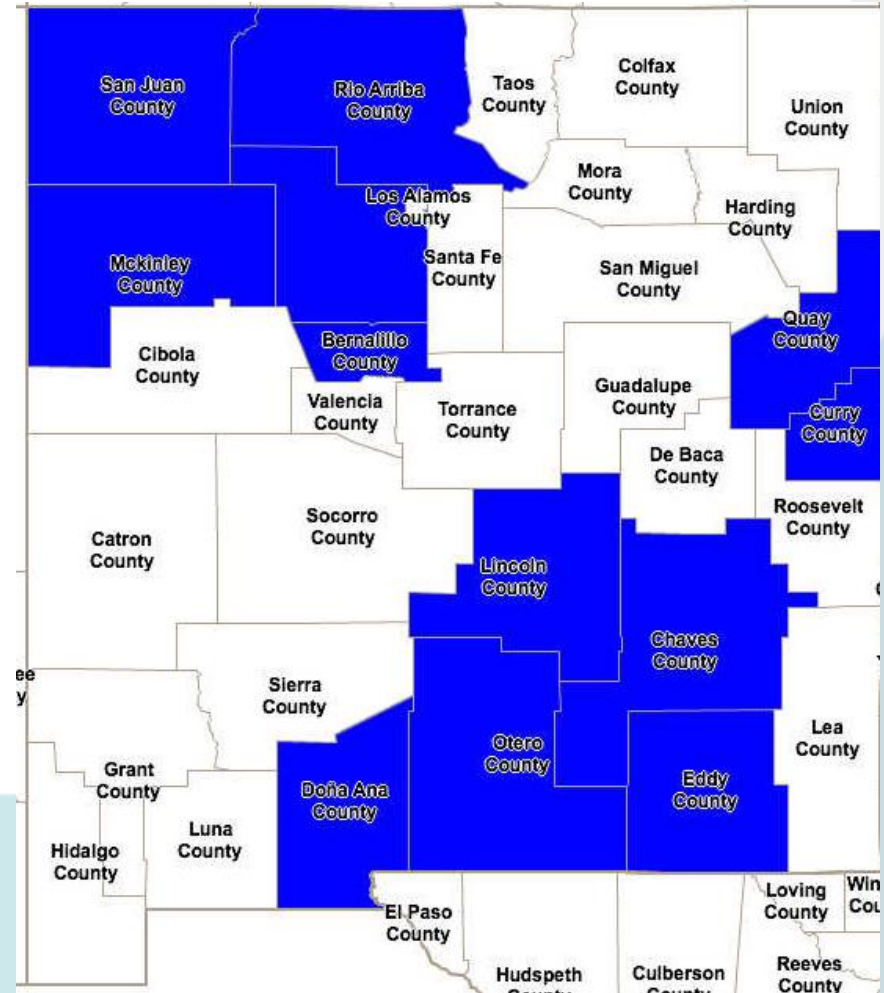

Synthetic Cathinones

- Clinical Effects
 - Signs and symptoms consistent sympathetic overdrive (tachycardia, agitation, hypertension, mydriasis, tremor).
 - Onset is dependent on route of exposure (minutes to an hour)
 - The high lasts 3-4 hours. Total experience is 6-8 hours.
 - Users comment that there is an urge to re-dose while coming down from their high.
 - Higher incidence of paranoia, agitation and combative behavior than with other designer amphetamines? This results in bizarre behavior (e.g. shooting guns at non-existent police, self-mutilation, fights, suicide, homicidal activity).

Synthetic Cathinones

NMPDIC Call Highlights

- 63 exposures since 1/1/2010; 21 females, 42 males
- Average of 4-5 exposures per month
- Age ranges from 13 years to 71 years; most are between 18 and 30 years
- $\frac{3}{4}$ of the patients were in the hospital at the time the poison center was contacted.
- Most of the patients were agitated (45) and having hallucinations/delusions (10). Many were having tachycardia (53), hypertension (20) and some had chest pain (11). Six patients had seizures.
- Most were treated with benzodiazepines (15)

NMPDIC Data (1/1/10 to 5/29/12)

Synthetic Cannabinoids

- Availability/Use
 - Sold as incense products
 - Product names include: K2, Spice (Arctic Synergy, Diamond, Egypt, Gold, Silver, Tropical Synergy), Mr. Smiley, Zohai, Eclipse, Black Mamba, Aroma, Bliss, Bombay Blue, Dream, Fake Weed, Genie, Sence, Skunk, Smoke, Yucatan Fire
 - Average Price: \$24-\$75 per 3 gms of product.

Synthetic Cannabinoids

- Active Ingredients
 - A wide variety of different compounds capable of activating cannabinoid receptors. Examples include JWH-184, JWH-146, JWH-176; Naphthoylindoles (JWH-015, 018, 019, 073, 081, 122, 200, 210, 398), naphthylmethyloindoles, naphthoylpyrroles, naphthylmethyloindenes, phenylacetylindoles (JWH-250, 253), cycloheptylphenols (CP47, 497; CP47, 497-C8, CP55,940, cannibicyclohexanol), benzoylindoles (AM-694, RCS-4)
 - Usually sprayed onto herbs, spices and plant material. The active ingredient (e.g. JWH-018) has also been purchased separately and used to create “homemade K2”.

Synthetic Cannabinoids

- Pharmacology
 - Act on cannabinoid receptors CB1 (euphoria) and CB2 (immune and pain response).
 - Synthetic cannabinoids have higher affinities for cannabinoid receptors than THC.

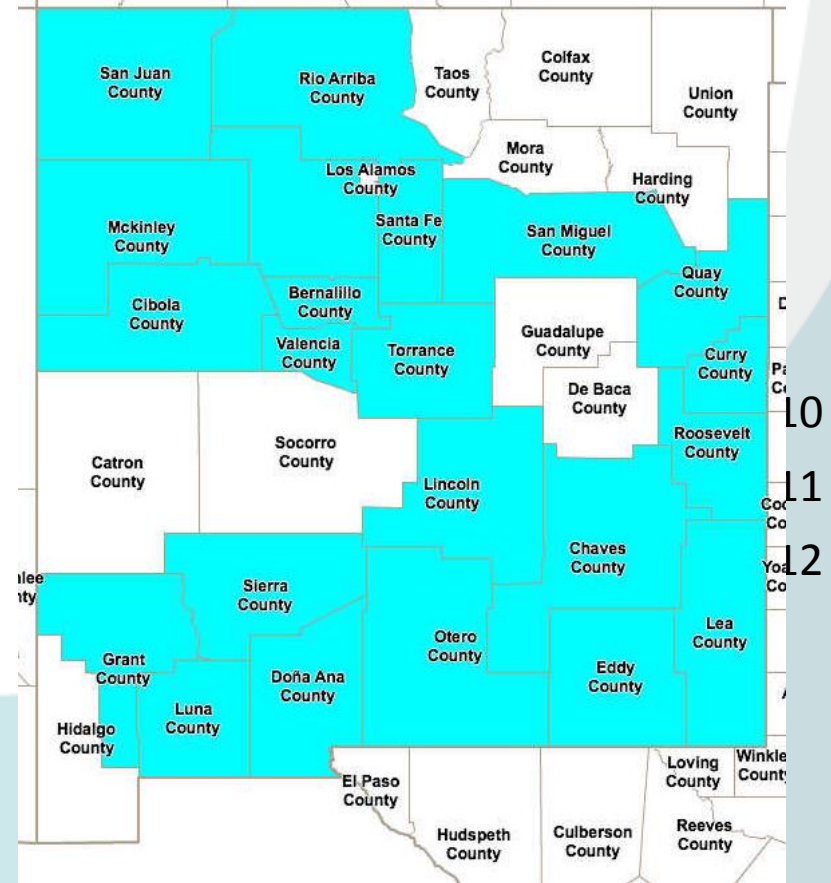

Synthetic Cannabinoids

- Clinical Effects
 - Euphoria, paranoia, hallucinations, anxiety, irritability, tachycardia, heart palpitations, chest pain, vomiting, tremor, and hypokalemia.
 - Onset is within minutes when inhaled.
 - The high lasts 1-1.5 hours
 - Higher incidence of paranoia, agitation and chest pain in comparison to marijuana
 - Higher incidence of life-threatening clinical effects (e.g. seizures, coma, arrhythmia)

Synthetic Cannabinoids

NMPDIC Call Highlights

- 147 exposures since 1/1/2010; 27 females, 120 males
- Average of 8-12 exposures per month
- Age ranges from 11 years to 62 years; most are between 15 and 30 years
- 80% of the patients were in the hospital at the time the poison center was contacted.
- Clinical Effects: agitation (45), hallucinations (22), tachycardia (53) and hypertension (20) and vomiting (25). Some had conduction disturbances (QTc prolongation) (7), tremor (8), seizures (6), and chest pain (11).
- Common treatments were benzodiazepines (25), IV fluids (32), and oxygen (13).

NMPDIC Data (1/1/10 to 5/29/12)

Salvia Divinorum

- Availability/Use
 - Product names include: Salvia divinorum, Diviner's Sage, Mystic Sage, Magic Mint, Sally D, ska Maria, ska Pastora, la Maria, heirba Maria, hojas de Maria, hojas de la Pastora,
 - Average Price: \$15-\$80 depending on concentration of extract used (5X, 20X, 40X, 60X, 80X).

Salvia Divinorum

- Active Ingredients
 - Diterpene called salvinorin A
- Pharmacology
 - Acts on κ opioid receptors to produce dissociation, delirium, hallucinations/delusions, sedation, and analgesia
- Clinical Effects
 - Altered mental state (confusion, disorientation, space-time disorientation), hallucinations, flushing, tachycardia, mydriasis, diaphoresis
 - When smoked salvia divinorum has a rapid onset and short duration of action (30 minutes). There can be lingering effects that last for hours.

Salvia Divinorum

- NMPDIC Calls
 - 5 exposures since 1/1/2010; all males
 - Age ranges from teen to adults most are 18 years old
 - 40% of the patients were in the hospital at the time the poison center was contacted.
 - The exposures occurred throughout the state
 - The patients we have managed are usually either hallucinating or disoriented.

Synthetic Phenylethalamines

- Availability
 - Replacements for mephedrone
 - Indane & tetralin derivatives
 - NRG-2
 - Pyrrolidine and piperidine ring derivatives
 - Ivory Wave
